

What's Minecraft?

Created by: Keileb
and Carissa

Minecraft is a computer
game created by Mojang.

The original Minecraft characters are Steve and Alex.

In Minecraft there are two modes that you can play. These modes are called "Creative" and "Survival"

In creative mode you have access to a unlimited amount of resources.

In survival mode you try to survive, and can collect resources. Watch out for mobs, for they can attack you!

Well, what is a mob? A mob in survival and creative is made up of zombies, skeletons, creepers, endermen, cave spiders and spiders. However, mobs can only attack you in survival. There are also mobs in different dimensions.
